**Examiner Interview Agenda – Wed. August 31, 2001, 11am Eastern**

Examiner Rutten,

In the RCE filed on April 28, 2011, claim 1 was amended as follows:

1. (Currently Amended) A method, comprising:

initiating compilation of a file in a processor-based system in advance of a request from a user to  
compile the file;

detecting the user request to compile the file; [[and]]

indicating a status of the compilation of the file in response to detecting the user request; and

wherein initiating compilation of the file comprises compiling the file in response to determining that  
the file has been modified, and wherein initiating compilation comprises:

**identifying the modified file in a work queue; and**

**initiating the compilation of the file based on the modified file being identified in the work  
queue.**

For our interview on Wed. August 31, 2001, at 11am Eastern, I would like to discuss the two newly  
added claim elements shown above (bolded) in view of the previously cited references (*McKeeman* and  
*Robinson*). I believe the amendments are not taught in the cited references and would like to discuss  
this with you, in addition to any possible other steps we can take to move this case toward allowance.

I look forward to speaking with you.

Best regards,

Nathan Black, Patent Attorney Reg. No. 66,191
